## NATIONAL TRANSPORTATION SAFETY BOARD

### Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

The National Transportation Safety Board intends to submit the following (see below) public information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance under the paperwork reduction Act of 1995 (Public Law 104-13, 44 U.S.C. Chapter 35). OMB approval is being requested concurrently with this submission. A copy of this individual ICR, with applicable supporting documentation, may be obtained by calling the National Transportation Safety Board Departmental Clearance officer, Larry Crabill (202) 314-6224. Comments and questions about the ICR listed below should be directed to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the National Transportation Safety Board, Office of Management and Budget, Room 10102, 725 17th Street, NW., Washington, DC 20503.

*Agency:* National Transportation Safety Board.

*Title:* Part 145 Maintenance Repair Facilities Questionnaire.

*OMB Number:* New.

*Frequency:* Once.

*Affected Public:* Federal Aviation Administration certificated air carriers.

*Number of Respondents:* 120.

*Estimated time per respondent:* 60 minutes.

*Total Burden Hours:* 120.

*Description:* The National Transportation Safety Board is currently conducting a study examining the oversight practices of certificated air carriers who use contract repair facilities for aircraft maintenance. The

Federal Aviation Administration (FAA) inspects air carrier maintenance operations and also certifies maintenance repair facilities that provide contract work. This study will look at the oversight practices used by both the air carriers and the FAA. In conjunction with the study, the National Transportation Safety Board is seeking clearance to obtain data from air carriers to identify their oversight practices.

Dated: November 18, 1999.

**Rhonda Underwood,**

*Federal Register Liaison Officer.*

BILLING CODE 1650-01-P

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-315 and 50-316]

### Indiana Michigan Power Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-58 and DPR-74 issued to Indiana Michigan Power Company (the licensee) for operation of the Donald C. Cook Nuclear Power Plant, Units 1 and 2, located in Berrien County, Michigan.

The proposed amendments would revise Technical Specification (T/S) Surveillance Requirement 4.5.1.c to require verification that power is removed from each emergency core cooling system accumulator isolation valve operator instead of verification that each accumulator isolation valve breaker is removed from the circuit. In addition, the proposed license amendments would revise T/S 3.5.1 to change "pressurizer pressure" to "reactor coolant system pressure" in the applicability and action statement requirements. The Bases for T/S 3/4.5.1 will also be revised to reflect both changes. Additionally, administrative changes are proposed to the page format.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the change involve a significant increase in the probability of occurrence or consequences of an accident previously evaluated?
